Andera Successfully Completes SAS70 Type II Audit

PROVIDENCE, RI – **April 12, 2007** – Andera, Inc. announced today that it successfully completed a SAS70 Type II audit. The SAS70 Type II audit was an independent examination that evaluated Andera's adherence to internal control policies and procedures around protecting customer data.

Having completed this audit with positive findings, Andera establishes its compliance with one of the most stringent, industry-accepted auditing standards for service companies and provides additional assurance to its clients that its environmental safeguards and logical, physical, and change controls operate effectively.

SAS70 (Statement on Auditing Standards No. 70, Service Organizations) is a set of internationally recognized auditing standards developed by the American Institute of Certified Public Accountants that is used by service auditors to assess the internal controls of a service organization. Andera received the certification following an on-site audit conducted in March 2007 by McGladrey & Pullen, a nationally recognized independent accounting and audit firm.

"We're thrilled to have completed our SAS70 Type II audit with such positive results," said Charlie Kroll, CEO of Andera. "This exhaustive, independent examination further illustrates our commitment to providing our financial institution customers with the highest levels of service, security, and reliability."

About Andera
